Founded in 1868 as „Pflügers Archiv für die gesamte Physiologie des Menschen und der Tiere" by *E. F. W. Pflüger*. Edited by *M. Verworn, E. Abderhalden, A. Bethe, R. Höber, A. v. Muralt, H. Rein* et al.

Published: Vol. 1–29 (1876) Bonn, Cohen und Sohn; Vol. 30–92 (1901) Bonn, E. Strauß; Vol. 93–170 (1917) Bonn, M. Hager; since Vol. 171 (1918) Berlin, Springer.

Since 1920 Pflügers Archiv has included: „Archiv für Physiologie" (Archiv für Anatomie und Physiologie, Physiologische Abteilung). Founded and edited by Johannes Müller, E. du Bois-Reymond, W. v. Waldeyer-Hartz et al. 1877–1914. Leipzig, Veit und Co., since 1915, Berlin, Vereinigung Wissenschaftlicher Verleger, afterwards Walter de Gruyter.

About the journal:

Lung publishes original papers, reviews and editorials on all aspects of basic and clinical research dealing with the lungs, airways and breathing, including developmental, environmental and genetic aspects. Although there is emphasis on studies of the healthy and diseased lungs and bronchi – including diagnosis, pathogenesis and therapy – the scope of **Lung** includes work on neurophysiological and other aspects of the control of breathing, on the respiratory muscles and the chest cage, and work on the cellular and tissue level as well as studies in animals and in humans.

Lung accepts papers from any one of the disciplines that contribute to our knowlege of the lungs, airways and breathing, including physiology, biochemistry, pharmacology, epidemiology, cell biology and environmental hygiene. Case reports, short communications, and technical notes are accepted if they are of particular interest.

The criteria of acceptance is the scientific merit and interest to our international and diverse readership. **Lung's** policies of scientific reviews of manuscripts and of rapid publication of accepted papers promote its chief aim: to serve as an effective, independent, international medium for the pulmonary physician as well as for physiologists, pharmacologists, environmentalists and others whose work is dedicated to lungs and to breathing.
